Aspiring computer engineer from mumbai with a strong foundation in software development and a diverse technical skill set.

EDUCATION

B.Tech in Computer Engineering

7.44 (CGPA)

- Alamuri Ratnamala Institute of Engineering and Technology, Shahapur.

2021-2024

Diploma in Computer Engineering

85.31%

- Thakur Polytechnic, Kandivali (East).

2018-2021

EXPERIENCE

Static.int Educare (Assistant Engineer)

As an intern, I gained hands-on experience with a diverse technology stack, including **Python, Django, Android, Flutter, Blockchain, Git**, and **GitHub**. I applied these tools to multiple projects.

May 2020- July 2020

RELAVENT COURSES

- Python Basics (Udemy)
- C++ Basic To Expert (Udemy)
- Introduction to JavaScript (Udemy)
- Digital Academy - Certification
Program in Java Full Stack (EduBridge)

SKILLS

- Programming: Python, Java, JavaScript, C++
- Frameworks: Django, SpringBoot, Angular
- Tools: Git , Github, MediaPipe
- Others: WebScraping, Blockchain, MySql

PROJECTS

• Indian Sign Language Recognition App (Python)

A **Python**-based real-time Indian Sign Language recognition application uses **MediaPipe** and **cvzone** for hand detection and tracking, with a **Keras** model trained on 8000+ images (Custom Dataset).

• Online Voting System (Full-stack)

Online voting system aims to provide a more convenient and efficient way for citizens to participate in elections and is a fullstack web application that uses **Angular, TypeScript, HTML, CSS** for user-friendly interface, **Java, Spring Boot**, and **DevTools** for efficient development, with **MySQL** as the underlying database.

• Covid-19 Case Tracker

Engineered a real-time COVID 19 case tracker using web scraping techniques on **JavaScript** to aggregated at a from 15+ external APIs, resulting in a comprehensive visualization of state-level infections and recoveries on an interactive globe.
